MONDRIAN AND HIS STUDIOS
RIETVELD MODEL RED BLUE CHAIR

Mondrian and Rietveld were inspired by the 'De Stijl' or 'neoplasticism' movement. This advocated essentialism of form and colour to allow pure abstraction and universality. Rietveld took to the concept of an armchair and transformed it into a 3D geometric expression of 'De Stijl' thought.

This chair is 1:6 scale to the original chair and details such as the natural grain of the wood and reproduced.
